### START A BAT ROOST

Dr. Charles A. Campbell in front of one of his bat roosts at San Antonio, Tex. Doctor Campbell has rendered the city of San Antonio a great service by his introduction of bats to combat the malaria mosquitoes that caused so many deaths in Texas. The bat is a natural enemy of the mosquito and they consist of its food. By building roosts for these bats, San Antonio was soon rid of its mosquitoes, besides making available land that heretofore could not be used on that account. The bats are self-oustaining, as the guano they produce is sold for fertilizer.

The Buchs never find time drug ging on their hands. Fording of their \$ faxes alone is a considerable tack, as each animal requires two and a half \$ bounds of fish daily. With 150 foxes on the island, the work of supplying sufficient fish for them is formidable in itself. Seal ment and vegetables tre also fed to the fexes, the vegeta-bles being raised by the Bachs.

er time the Barchs some-

mer. They prefer a calm, quiet day to a windy day. They make their homes and nests where they will be least af-fected by the wind. You will always find a rabbit sitting where the wind doesn't blow upon it; it is protected from the wind always. The same thing s true of other unimals, and of the

And yet the wind is tremendously iseful. If the air were to remain motionless for a day, if a perfect calm should come over the face of the earth. ife would cease to be, and vegetation would perish. Everything would suf-locate or be destroyed. For it is the wind that keeps the earth pure and sweet and fresh, and prevents animal ife from burning up, and makes vegetable life possible.

And when it comes to pure delight, there isn't anything that exceeds the wind. To have it pass over us, to feel It upon our cheeks, even when it is cold and harsh, surely there is nothing tuore glerious. To walk in the face of n storm, as if meeting the wind halfway-there isn't anything finer than that, and we are going to miss a lot of pleasure if we do not get out and face the wind-and enjoy it.

MANY REASONS FOR GARDEN

Duty of Every Town Dweller to Help Out Farmer in His Task of Feeding the World.

Food production to the uttermost is just as grim a necessity this year as it was last. Then we needed food to feed our soldiers. Now we need food to supply a world most of which has not had all it wanted to eat for three years. Now, as then, the farmer can-not carry the burden alone. He must have every help that the city, suburben and village dweller can give. Make a garden for the world's sake.

Vegetables and fruits raised in a home garden have a flavor that never is found in products carted around the country, or displayed in hot show windows. Make a garden for your palate's

Gardening is the finest exercise with in reach of a moderate purse and about the only one which will pay you air wages for keeping yourself well. Make a garden for your health's sake, Gardening is one of the most inter-

sling and educational of activities, especially if you make room for flowers as well as vegetables. It brings back some of the old world lore which a too citified life loses. Make a garden for your mind's sake.

The day is coming when garden cities will be the rule, but you do not need to wait for slow social developments. There are very few districts in which one cannot make a start at a garden city now. Try it.

### CIVIC BEAUTY GREAT ASSET
